

The best support for great results

AGRIBOMBA

Innovation and pioneering - since 1987

- Unmatched performance of its requiring functions;

- Insuperable in attributes that makes it safe and reliable to operate;

- Unbeatable forerunner of innovations incorporated to the product.

Reference of safety and reliability gained by its pioneering status added to 25 years of constant product technological innovation*.

AGRIBOMBA IN USE

BASIC COMPONENTS

GREAT RESULTS IN THE FOLLOWING SECTORS

Sugarcane

Forestry

Environmental Reserves

Cotton

FEATURES

BASIC

Firefighting:

- In vegetation of any size such as sugarcane plantations, pastures, woods, forests, environmental preservation areas, etc.;
- Isolation in the formation of moist clearings.
- Warehouses, lumberyards, houses in general.
- In agroindustrial waste such as sugarcane bagasse, sawdust and others.

Controls fires, makes embers and fire breaks in all types of vegetation.

Sentinel in fire prevention.

ADDITIONAL

It treats the soil by performing the following operations:

- Removing dust in roads, plots, maneuver patios and parking lots, etc.
- Soil compaction and building embankments and earthworks.

Irrigates by aspersion in plantation areas or performs the maintenance of lawns and flowerbeds or seedling nurseries.

Washes effectively:

- Tractors, combines, machinery and implements many in the field or at headquarters.
- Floors and facilities in general such as patios, factories, stables, barns, farms, etc.

SPECIAL

High-pressure blast washing:

- surfaces encrusted with dirt that require working pressures above 100 bar as vehicles, tractors, combines, machinery and implements in the field or at headquarters.

Note: Double pump available as optional (firefighting and washing) with cam & fork gearbox (CBV-TR)* that conditions the drives of pumps independently and automatically. *Patented

CAIXA-BOMBA: THE HEART OF AGRIBOMBA

Simple:

Exclusively mechanical, the drive and transmission assembly combines robustness with simplicity, both constructive and operational. It is comprised of a rotation and torque multiplier gearbox that is directly coupled to a centrifugal pump.

Powerful:

It lets you capture the exchange and transfer pump for continuous power, better than any other system, with the advantages of not requiring adjustments, stretches and constant lubrication.

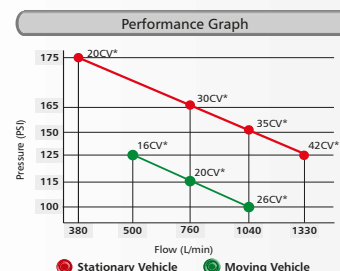

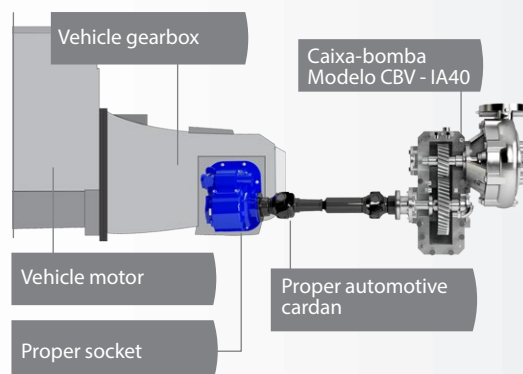

Reliable:

It provides a low level of breakage and unwanted stops, because the transmission between the socket and the gearbox is made directly by an automotive homokinetic cardan.

Versatile:

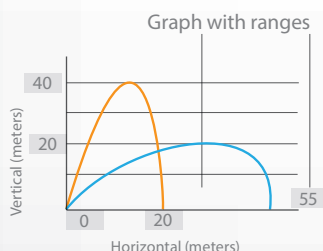

It has various transmission/multiplication ratios, always matching the best pump performance with the best torque and rotation spots in the vehicle engine/Chassi.

It operates both with the vehicle stationary and moving, ahead and in reverse gear.

MORE INFORMATION

CYLINDER ENGINE

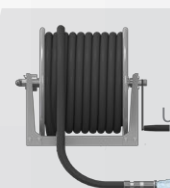

EASY, AUTOMATIC COUPLING*

*Patented
Device that enables the change of gears with the vehicle moving and the pump operation.

HOSE REEL

Model RM 2530
Flow: Up to 250 L/min
Pressure Up to 150 PSI

Av. Marginal Sérgio Cancian 5293

Phone: +55 16 2105 3622

CEP [ZIP code]: 14176 503 - Sertãozinho SP
